HELPING YOU SAVE ENERGY AT HOME

Many people will see their energy costs rise because of the extra time spent at home due to the COVID-19 outbreak. This workshop has been designed to help us stay in control of our future energy bills as well as reduce our impact on the environment. Learn new practical tips & hints and test your own understanding of energy saving!

SWITCHING TO SAVE

Switching supplier is one of the most effective ways to save on your energy bill however for many it can seem like a confusing process. This workshop aims to help you understand your bills and how to switch along with understanding the range of tariffs out there.

LOVE FOOD HATE WASTE

This workshop is funded by Zero Waste Scotland and aims to raise awareness of issues caused by food waste. Discover new ideas for food planning, portioning, freezing and using up leftovers and save hundreds on your food costs.

SAVING WATER IN SCOTLAND - REALLY?

Home Energy Scotland is working in partnership with Scottish Water to help thousands of households save water, energy and money every year. Around one fifth of the average household's heating bills are spent on heating water. This workshop will help us to use water more wisely and keep our energy bills down.

HOW CAN SOLAR PV & ELECTRIC VEHICLES BENEFIT ME

Interested in the potential for combining Solar PV and domestic charging of electric vehicles? This is the workshop for you. This workshop delves into the topics of solar PV, electric vehicle charging, and how combining the two can save you money and help the environment. Our Home Renewables specialist will be on hand to answer your questions and cover the support Home Energy Scotland can provide.

EMBRACING GREENER TRAVEL

Climate change is an immediate and urgent problem. Transport and travel are major sources of the release of Carbon Dioxide (CO₂) and other harmful emissions into the atmosphere. Join this session to find out about the scale of the challenge of emissions in Scotland and how to tackle some of the barriers or concerns you may face in adopting active travel or moving towards electric vehicles.

DISCOVER RENEWABLES

Change is happening. Scotland is choosing clean, renewable energy and you can too. Learn about the current renewable technologies, how they could be of benefit to you and your home, and funding support available including grants and installation offers. We can also advise you on our free and impartial Home Renewables Specialist service.

INTRO TO ELECTRIC VEHICLES

As electric vehicle adoption increases and the Scottish Government works towards phasing out the need for petrol or diesel cars by 2032, it may be time to consider making the switch. This workshop covers the benefits of electric vehicles and addresses some of the concerns people may have.

HOW DO EBIKES WORK?

Active travel is becoming more popular than ever and ebikes are an exciting way to access the benefits associated with it. This session dives into to the what, why, and how of ebikes that will engage both those completely new to the topic and those interested in learning more.
